

Have you checked out the new, state-wide Montana Career Pathways? Go to www.mus.edu/MCP and explore the new approach to Pathways for the state of Montana.

For the past year the Montana University System and the Montana Office of Public Instruction have been working on a major overhaul of the Big Sky Pathways program. This overhaul updates and brings the program into better alignment with national trends and best practices in Career Technical Education. It will change the way pathways are created and documented and shift the program focus from documentation to utilization. Montana Career Pathways is the next evolution of Big Sky Pathways, building on the successes in the past but clearly focused on the future to improve the clarity, scalability, and the functionality of the college and career information we provide to students, parents, educators, and the public.
